A Great-Tasting Trio of Vitamins for Bone, Immunity, and Cardio Health*

- Supports strong and resilient bones and teeth*
- Optimizes calcium metabolism*
- Promotes cardiovascular health*
- Helps maintains immunity*
- A healthier gummy that's free of sugar, artificial dyes, and unnecessary fillers*

Vitamins A, D, and K are three of the most important nutrients for health. Yet, most people aren't getting enough from diet alone, and our modern indoor lifestyle leaves many people starved for vitamin D.* In recognition of the importance of these three nutritional powerhouses, we formulated **ADK Gummies**, a great-tasting, pineapple-flavored supplement. It's sweetened with allulose, a naturally occurring sugar substitute that supports healthy insulin sensitivity, blood sugar, and weight management.*

Supports Strong Bones and Teeth*

ADK Gummies provides a trio of vitamins that build healthier, stronger, more resilient bones and teeth.* Vitamin D oversees the absorption and use of calcium by the body and bones.* The vitamin K2 in ADK Gummies is menaquinone (MK-7), a special form important for normal bone formation.* Vitamin K2 activates a critical protein, called osteocalcin, which transports and integrates calcium into bones.* Vitamin A supports normal development, growth, and repair of bones.*

Promotes Cardio Health*

Vitamin D3 in **ADK Gummies** supports cardiovascular function and blood pressure within the normal ranges.* Optimal vitamin K2 ensures calcium is deposited into bones instead of arteries.* That means arteries stay soft and flexible for smooth blood flow.*

Strengthens Your Immune Defenses*

Vitamin A helps maintain immunity by keeping the mucosal barrier strong.* Vitamin D also is important for immune health.* The vitamin D receptor is expressed on the majority of immune cells, showing how important vitamin D is to the immune response.*

Helps maintain Healthy Blood Sugar*

Gummy vitamins often contain sugar and other unwanted ingredients. That is why we formulated a healthier gummy alternative, without unnecessary fillers or artificial dyes or colors. What's more, **ADK Gummies** are sweetened with allulose. Unlike many other sweeteners, allulose helps maintain healthy blood sugar and insulin, supports metabolism, and aids in weight management.* Allulose is found naturally in figs, raisins, and maple syrup and is about 70% as sweet as sugar without the calories. It acts as a naturally occurring prebiotic, is keto-friendly, gluten-free, non-GMO, vegan, and supports dental health.*

ADK Gummies are recommended for:

- Targeted vitamin support*
- People who don't like swallowing pills
- Staying active while aging*
- Strong teeth and bones*
- Smooth-flowing circulation*
- Proper calcium distribution in the body*
- Helping defend the immune system and gut lining*
- Blood sugar support with the natural sweetener allulose*

Supplement Facts

Serving Size: 2 Gummies

Amount Per Serving

Calories	20
Total Carbohydrates	5 g
Dietary Fiber	2 g
Vitamin A (as Retinyl Palmitate)	1,500 mcg
Vitamin D3 (as Cholecalciferol)	125 mcg (5,000 IU)
